# Eugene Guard

LANE COUNTY'S HOME NEWSPAPER

An independent afternoon newspaper published daily except Sunday

Offices 1037-1041 Willamette Street Telephone 1200

ALTON F. BAKER - - - - - Editor and Publisher

The Eugene Guard is a member of the Associated Press. The Associated Press is exclusively entitled to the use for publication of all news dispatches credited to it or not otherwise credited in this paper and also all the local news published herein. All rights of publication of special dispatches herein are also reserved. The Eugene Guard is a member of the Audit Bureau of Circulations.

The Guard serves the city of Eugene and Lane county, a territory as large as the state of New Jersey and one of the richest areas in the Northwest. The city had on Jan. 1, 1928, a population estimated at 25,000; the Eugene trading area (radius 70 miles) a population in excess of 50,000.

Second only to Portland is the Eugene market. Center of a rich agricultural area, a division terminal of the Southern Pacific railroad and the Northern lines, home of the University of Oregon. One of the lowest hydro-electric power rates in the United States is bringing Eugene forward rapidly as an industrial and commercial center.

## TOO MANY COOKS

FROM a distance it begins to look as though the efforts at property tax reform in Oregon this year might result in a grand mess. Nobody is very happy over the findings and recommendations of the Carkin committee. The legislature, instead of finding difficulties smoothed out is apt to find them all stirred up.

The proposed income tax apparently does not satisfy the Grange or Labor because with the proposed property offset it does not hit large units of income hard enough. Utilities and other industries instead of being gratified with the offset are back on their old stamping grounds conjuring up the bugaboo of any kind of income tax. School revenues are in danger. Highway revenues are in danger. The property owner is hunting up a microscope to find the promised relief and the state is still "broke."

Far be it from us on the sidelines to disparage the long toil and sincere efforts of those who have served on the interim committees. They've had a thankless task. But the situation causes us to comment once more on our method of doing things.

If the Carkin group were actually the legislature, empowered to fight the thing out to a finish and produce a piece of legislation for better or worse, there might be some chance of getting at least a passable result. But the Carkin group has no such powers and its patchwork of ideas goes now to a group of raw legislators to be whipped into shape along with a multitude of other laws in the short space of a couple of months.

When are we going to get over tinkering with special and semi-official agencies to do legislative work? When are we going to stop providing made-to-order alibis for legislatures and turn back to them the full burden and responsibility of their proper work. We may have to provide longer sessions, perhaps higher pay and allowances, and probably better legislators but we certainly aren't making much progress with the present method of calling out the volunteer firemen every time there is a big piece of work.

## A VICTORY IN CHICAGO

IT is extremely comforting to read that Chicago has succeeded in convicting Angelo Petitti and Andrew Cappellano of kidnaping 10-year-old Billy Ranieri.

Few of the strange things that have happened in Chicago were more disquieting than this case. To begin with, the father of the boy was afraid, for days, to notify the police that his son was missing. Then, when the boy was restored to him and indictments were voted, a period of terrorization began. One state's witness was murdered. Two or three more were beaten. The trial judge was threatened with death, as were the prosecutors and other witnesses.

Under such circumstances, it would have been quite understandable if the jury had not dared to vote convictions.

But the jury did dare. The verdict can be accepted as notification that Chicago is fighting her way out of the grip of the underworld. It is cause for rejoicing on the part of all who love orderly government.

## THE MONMOUTH FIRE.

THE rooming house fire which took the lives of three young girls at the Oregon State Normal school at Monmouth is a horrible warning that people should not be crowded together into old buildings without at least a little extra protection in the way of alarm systems and extinguishers. The inquiry into the Monmouth disaster will be a waste of time unless it tells us just what we can do to prevent similar disasters.

In all Oregon schools and institutions there should be an immediate check on fire hazards and on what protection there is against them. Eventually this state must see to it that its institutional housing is fireproof throughout. We need a definite housing and protection program. The state is not rolling in wealth but it cannot afford to be careless or parsimonious in such matters.

## WHAT OTHER NEWSPAPERS SAY

**Paper Mill Troubles**
(Salem Capitol-Journal)

President Fred W. Leadbetter, of the Oregon Pulp and Paper company says that because of the high cost of taxes, removal of the Salem plant to Vancouver, Wash., is deterred only by sentimental reasons, as a cold blooded business policy would necessitate it. Vancouver offers free site, exemption from taxation for 10 years, with promise of further exemption. The saving in taxes, some $50,000 a year, would in a few years pay the cost of modern factory type buildings and removal of machinery. Saving in freight rates on supplies and manufactured product, would further add to profits as Vancouver has water transportation.

Much of the investment on which the paper mill's assessment is based is for expensive type of construction necessitated by its disadvantageous location, for other construction in remodelling and enlarging which replaced previous expensive construction, and for machinery which to increase and cheapen production, has been scrapped as obsolete. It is also claimed taxation is proportionately greater than that of competitors.

The mill was originally located under the supposition that there would be joint cooperation with the adjacent lumber plant for mutual profit. Lack of cooperation handicaps both industries. Shrinkage in paper prices since the mill started compelled additional investment as well as absorbed earnings to secure quantity production and so lessen production costs to meet competition. Hence there have been no profits for some time.

Vancouver and other Washington cities, in the effort to secure industries offer all kinds of concessions, free sites, tax exemption, etc. Even Astoria offered the same inducements to secure a paper mill, besides voting a municipal bond issue to supply free water to the mill. Yet the demoralized condition of the paper market has thwarted promotion of the enterprise. It is the payroll, not the taxes, these cities seek.

All of this calls attention to our absurd system of taxation, which is to penalize enterprise and industry. The builder and developer is punished for creative efforts. The property tax should be abolished and excise and income taxation substituted.

## 20 Years Ago

(From The Guard, Jan. 5, 1909)

TODAY has been by far the worst day of the winter. Last night's warm rain turned to snow early this morning, and during a greater part of today a cold sleet has fallen.

* * *

New people are coming to Eugene from all parts of the globe, the latest arrival being Andrew McMillan, from Puyallup, Wash., who has purchased a lot in City View Park and will build thereon a handsome residence.

* * *

Building Inspector McFarland states that during the year 1908, the total cost of buildings erected in Eugene was $582,358.

* * *

W. M. Green, E. D. Matlock, W. A. Bell and George T. Hall Jr., are among the Eugene grocers who will go to Portland tonight to attend the annual convention of the state retail grocers. They will work for the next convention at Eugene.

* * *

R. S. Huston has received a postal card from Harvey Scott, who is now in the Philippine Islands with the U. S. navy. Mr. Scott's home is at Creswell. He was a member of Company C, Second Oregon Volunteers during the Spanish-American war, and served with the regiment in the Philippines.

**For These Short Days**

SHORT HOURS feature today's puzzle, but they're long enough to enable you to get five strokes in and complete the puzzle in par. One solution is on the classified page.

| | | | | |
|---|---|---|---|---|
| S | H | O | R | T |
| | | | | |
| | | | | |
| | | | | |
| H | O | U | R | S |

**The Rules**

1—The idea of Letter Golf is to change one word to another and do it in par, a given number of strokes. Thus to change COW to HEN, in three strokes, COW, HOW, HEW, HEN.

2—You change only one letter at a time.

3—You must have a complete word, of common usage, for each jump. Slang words and abbreviations don't count.

4—The order of letters cannot be changed.

One solution is printed on the classified page.

## This date in AMERICAN HISTORY

**January 5**

1781—British, under Benedict Arnold, plundered Richmond, Va.

1784—England relinquished sovereignty over colonies.

1708—Congress voted $12,800 to Kosciusko, Polish patriot who aided the colonies during the revolution.

**BEETS AND BEET GREENS**

Beets were originally found in Asia, where they still grow wild, but there is little resemblance between the tough, fibrous root of the wild plant and the tender, succulent vegetable so familiar to us. Beet leaves have been used for greens for at least two thousand years, possibly long before the root was really edible.

During the first year of its growth, the beet collects, and stores in its fleshy root, the rich, nourishing elements which would be used the second year for the growing of its flower stock and seeds. The beet root is only edible the first year. During the second year the strength is shot entirely into the seed stalk and the root withers and becomes tasteless.

The color of the table beet varies from light yellow to deep red. The sugar beet may also be used for food—either the root or greens. Only the smallest of either should be selected, for, as they become older, they may contain as much as 12 per cent starch.

Beets are among the most economical of all vegetables because when young and tender they may be eaten entirely—root, stalk and leaf.

Sugar beets contain a larger amount of potassium, magnesium and sugar than do the red table beets, but not as large an amount of sodium or iron. The beet leaves are among the most alkaline forming of all foods and combine well with any other food-stuff. Try these methods for preparing beets:

**Raw Beet Salad.**

The leaves of raw beets may be finely shredded like cold slaw and served in the same way. The small roots may be washed and grated like raw carrots and form a pleasing and colorful addition to any raw vegetable salad.

**Baked Beets.**

Beets may be baked in much the same manner as the potato. This conserves all of the mineral elements and gives them an especially appetizing flavor.

**Boiled Beets.**

To prepare beets for boiling, they should be scrubbed well with a coarse vegetable brush and never scraped to the slightest degree, as many of the important organic salts are immediately under the skin and would be destroyed, as would be much of the agreeable beet flavor. They should be boiled in plain water and seasoned with butter and salt when served.

**Beet Hash.**

After washing, the beets may be ground through a vegetable grinder and this ground-up material may be packed into a cake pan, baked in the oven, and served with butter.

**Beet Greens.**

After a careful washing, the beet greens and chopped stems may be placed in a pan without any water except that which clings to the vegetables after washing. Place a cover on the pan and allow it to simmer over a low fire for about ten minutes. Then increase the heat and allow a vigorous boiling for about five or ten minutes longer. In this way the beet greens will be cooked in their own juice, as the first ten minutes of cooking draws the juice from the leaves so that sufficient liquid is available for cooking. If you desire, the small beet roots, themselves, may be finely sliced and added to the greens and cooked at the same time.

**Canned Beets.**

Even if beets are not in season, one can secure the small baby beets in cans. These are easily prepared by slicing for a salad or heating as a vegetable for dinner. Canned baby beets are quite wholesome.

## THE TINYMITES

(Read the story, th en color the picture)

AS Clowny soared and sailed around, the others stood down on the ground and watched him very closely. It was quite a sight to see. The wings the fairy let him take were very strong and did not break. 'Course Clowny felt real proud and he exclaimed: "Just look at me."

Then Scouty cried, "You're not so good. It looks like anybody could stay in the air if they just had the wings you're using now. Just fly down here and let me try, and I will shortly prove that I can do some little tricks. Come on, and I will show you how."

"All right, I'll let you have your turn," said Clowny. "But you'll have to learn to keep the wings a-flapping or you'll topple from the air." So Scouty tried, and did real well, and then he heard the others yell, "It's our turn now. You take too long. That really isn't fair."

When all of them had had their try at sailing gently, low and high, they thanked the little fairy for the use of her fine wings. Said Clowny, "My that sort of fun is better than to walk or run. I wish I owned a pair of these. They're handy little things."

Just then a black bird swooped down near and filled the little band with fear. "Look out!" exclaimed a frightened dwarf. "He'll take you, if you don't." It grabbed a fairy in its beak, and Clowny was the first to speak. Said he, "You think you'll steal her, but I'm certain that you won't."

And, as the bird began to rise it looked bout twice brave Clown's size. The fairy was so frightened she could hear her own heart beat. The others soon saw Clowny race, until he reached the proper place. And then he leaped right out and grabbed the big bird by his feet.

(The Tinymites have an unusual meal in the next story).
